

PROCESSING

- Broad range of services
- Certified quality management
- State-of-the-art machinery
- Flexibility and reliability

Processing at Fischmarkt Hamburg-Altona GmbH specialises in packaging and refinement services for all kinds of deep-frozen products. Furthermore, we have been producing traditional herring in jelly for decades.

Our operating permit granted by the European Union (DE-HH-EFB 001-EU) and comprehensive certification (IFS6, MSC, ASC and BIO) are your guarantee of optimised processing and quality assurance as well as transparent processes. The team at FMH has many years of experience and is extensively qualified. At the same time, the modern equipment contributes to ensuring a high level of quality.

With the close links between deep-freeze storage and processing at Fischmarkt Hamburg-Altona GmbH, we are able to offer our customers synergistic benefits and specialist services under a single roof.

Our service range comprises: bag packaging, folding box packaging, vacuum packaging, shrink-wrapping, portioning/sawing, glazing, calibrating, frosting, labelling, repacking as well as the production of herring in jelly as a counter tray, bulk consumer tray or self-service package.

Our machinery and equipment includes: tubular bag system, folding box machine, combinable multi-weighing system, glazing and calibrating machines etc.
